

Heinz Feldmann, MD, is the Chief of the Laboratory of Virology at the Rocky Mountain Laboratories (RML), NIAID, NIH, and the Chief Scientist of the RML BSL4 Laboratories. In addition, he holds a position as an Associate Professor with the Department of Medical Microbiology, University of Manitoba. His expertise is in high containment viruses (BSL4) and he serves as a consultant on viral hemorrhagic fevers and related pathogens for the World Health Organization. In that capacity Heinz has field experience and expertise in outbreak management. His research interest is in vaccine development and the pathogenesis of hemorrhagic fever viruses, such as filoviruses, arenaviruses and bunyaviruses, and other special viral pathogens (high containment, BSL3 and BSL4).
